For Treasurer

F. W. Piper

I announce myself as a candidate of Weber County, subject to the will of the Republican County Conven-

tion.
I have been a resident of Ogden to continue to make this my home I am a property owner and a tax

payer and am interested in seeing our taxes reduced I believe no one should aspire to a public office they are not thoroughly competent to handle. With thirteen years of banking exper-ience in handling the public's funds

the taxpayers may expect efficient service from me If nominated and elected I shall devote all my time to the duties of the office, giving the best possible

service with the least possible cost (Paid Political Advertisement)

"The Mutiny of Elsinore" with All-Star Cast Scores at the Utah Theatre

Dan R. Smith, formerly travelling auditor for the Mountain States Telephone and Telegraph company with general headquarters at Benver, and until recently district cashier with headquarters at Boise arrived in Ogden today to succeed C. A. Poff as manager of the Ogden group of exchanges. Mr. Poff recently departed for California where he is recuperating from an illness which has lasted for more than a month.

Mr. Poff entered the local service in March of the present year coming to the local offices from Sall Lakelie is a veteran of the telephone and will return to the service just as soon as he is able to resume his duties. It is said.

Mr. Smith the new manager has been in the employ of the Mountain States Telephone and Telegraph company for a number of years. Mr. Smith assumed his new duties today.

NEW PANTAGES BILL

NEW PANTAGES BILL

Thrills of the most intense description were the order of the day vester day when the new Metro special production, where the order of the Editore day when the new Metro special production, and the Luah the All-Bit for three days, and during thus time apportunity should be open for all who care to be thrilled to take in the production, and set its quality for making the chills creep up and down the spinal calumn.

"The Mutiny of the Elsinore" enjoys the distinction of being one of the most intense and gripping photodramas of the season. It is the picturization of the late Jack London's novel of the same name, and it possesses all of that master writer's genius for portaying the conflict of strong men in the far, rough places of the earth, where the only law in existence is the law of the stand gum.

The story concerns John Pike, the first mate of the sailing ship, "Elsinore," who has signed up a motley crew of thugs and gumen from the water front dives of Frisco, and who once at sea finds himself pitted against these hostile forces for the mastery of the vessel.

Postal Traffic Is Starting to Gain

YOUHAD BETTER

If you want to get in on the Ellis Automatic Tire Pressure Gauge Company, the concern that we predict is going to make more money for its stockholders than anything ever offered in this field. You have better act right now. Ten days from now may be too late. The field for this device is unlimited. Its money-making possibilities cannot be overestimated. A few hundred dollars invested NOW may make you many thousands in the near future. You can't think of a single successful invention in the automobile industry that has not made fortunes for its original investors. But you must buy stock in these concerns before the device is universally used. Every dollar spent for automobiles in Utah now goes east. Why not establish a factory here that will bring hundreds of thousands of this money back to Ogden?

We are determined to hold this device from the money-grabbers in the east. We are going to make these gauges and distribute them from Ogden if possible. An invention in a device that is a necessity is the surest and quickest road to wealth. Most people who invent devices of this character sell them for a song to the large eastern companies, principally for the reason that they are unable to capitalize their device at home and place it on the market, and thus the large eastern concerns grow fat from the ideas and inventions of western men.

There is not a single automatic gauge on a car in America today so far as we are able to learn. There are 7,600,000 cars awaiting installation. How many Ellis Gauges can we install in the next two years? If we place four in every one hundred we can all make a fortune. We predict with all since ity that there will not be a car in America without an automatic air pressure gauge within two years. Help us financially to accomplish this result and you will thank your lucky star that you were one of the original

Our factory will soon be in operation and when it is, you won't be able to buy stock at the present price. We advise you to act promptly. You may see the gauge installed at our new office in the Commercial National Bank Building. Phone, write or wire
